FAQ

Secunia Personal Software Inspector (PSI)

Stay secure by patching and updating insecure programs

Patching insecure programs helps safeguard your data and PC against cybercriminals. Secunia PSI is a security scanner which identifies programs that are insecure and need updates. It even automates the updating of many of these programs, making it a lot easier to maintain a secure PC.

Awards

Secunia PSI is one of 6 Super Security Freebies. Click [here](#) to read more.

"Secunia PSI won't do away with the need to run a good antivirus program and firewall on your PC. But it provides a solid layer of free protection that no PC should do without".

"Number one is the Secunia Personal Software Inspector, quite possibly the most useful and important free application you can have running on your Windows machine".

Screenshots

The following screenshots of the Secunia PSI version 2.0 give you a glimpse at some of its functionality. We hope you like what you see and wish to secure your computer using the free Secunia PSI.
